# Assistive Technology Exploration Notes

Use this worksheet to explore a tool or accessibility feature in context. The person using the tool should be involved in choosing and evaluating it.

## Describe the task

**What does the person want to do?**

**Where and when will the tool be used?**

**What is already working or helping?**

## Try and observe

- Can the person use the tool comfortably and independently, or with desired support?
- Does it help with the intended task in the real setting?
- What training, setup, or accessibility changes may be needed?
- Is there a privacy, cost, compatibility, or maintenance question?

## Plan a follow-up

**Tool or feature explored:**

**What the person liked or would change:**

**Next question or person to contact:**

**Keep in mind**
No product works for everyone. In IDEA school contexts, assistive technology requirements depend on the individual program and applicable rules; ask the relevant team.
